Cardiac Assessment

- Abd Adult(18-65) Adult Dys AMS Cardiac ETT Ger(65+) IV
 Medication OB Ped(<18) Ped Dys Psych Syncope Trauma Vent

Student name: _____ **Date:** _____ **Patient age:** _____

List all medications administered by student:

EKG interpretation:

Note: You MUST attach a copy of the EKG in order to get cardiac assessment credit!

Physical Assessment	
Level of consciousness: A V P U Agitated Obtunded Confused Uncooperative	
Airway patent: Yes No Respirations: Normal Labored Hypo Hyper Absent	
Circulation: Pulse found at: Radius Carotid Strong Weak Absent Regular Irregular	
Skin signs: Temp: Normal Cold Hot Moisture: Dry Moist Color: Pink Pale Cyanotic	
Cap refill <2 secs? Yes No JVD? Yes No Pitting edema? Yes No	
Pupils: Equal Unequal Reactive Fixed Dilated Pinpoint	
Description of breath sounds:	
Patient's chief complaint:	
Description of chest pain: Pressure Crushing Dull Burning Tearing Throbbing Stabbing	
Onset: Gradual Sudden Pain is: Constant Intermittent	
Provocation (what makes it better or worse): movement rest food/drink position	
Quality: Constant Intermittent Sharp Dull Tearing Cramping Burning	
Radiation: Back Shoulder Arm Shoulders Flank Neck Jaw Other:	
Severity: 1-10 scale: At onset: 1 2 3 4 5 6 7 8 9 10 Currently: 1 2 3 4 5 6 7 8 9 10	
Time: Hours: _____ Days: _____	
Location: Substernal Left lateral Right lateral Left anterior Right lateral	
Associated S/S: Nausea Dyspnea Vomiting Malaise Weakness	
Activity at onset:	
Pain worse with respirations? Yes No With movement? Yes No	
Has this happened before? Yes No Diagnosis:	
Cardiac history? Yes No Diagnosis?	
Cardiac surgery? Yes No What?	
Did pt. take NTG? Yes No Relief? Yes No ASA? Yes No	
Patient final diagnosis:	
Briefly review the pathophysiology of the patient's problem:	
Briefly review potential sequelae of patient's problem and/or treatment received:
