

Description of the Profession

EMT-Paramedics have fulfilled prescribed requirements by a credentialing agency to practice the art and science of out-of-hospital medicine in conjunction with medical direction. Through performance of assessments and providing medical care, their goal is to prevent and reduce mortality and morbidity due to illness and injury. EMT-Paramedics primarily provide care to emergency patients in an out-of-hospital setting.

EMT-Paramedics possess the knowledge, skills and attitudes consistent with the expectations of the public and the profession. EMT-Paramedics recognize that they are an essential component of the continuum of care and serve as linkages among health resources.

EMT-Paramedics strive to maintain high quality, reasonable cost health care by delivering patients directly to appropriate facilities. As an advocate for patients, EMT-Paramedics seek to be proactive in affecting long term health care by working in conjunction with other provider agencies, networks, and organizations. The emerging roles and responsibilities of the EMT-Paramedic include public education, health promotion, and participation in injury and illness prevention programs. As the scope of service continues to expand, the EMT-Paramedic will function as a facilitator of access to care, as well as an initial treatment provider.

EMT-Paramedics are responsible and accountable to medical direction, the public, and their peers. EMT-Paramedics recognize the importance of research and actively participate in the design, development, evaluation and publication of research. EMT-Paramedics seek to take part in life-long professional development, peer evaluation, and assume an active role in professional and community organizations.
