

PROGRAM GOALS AND OBJECTIVES

The goals of the Community College of Aurora EMS Program are as follows:

- A. **COGNITIVE** – Provide the EMS student with the knowledge to successfully meet or exceed the requirements of the CCA program.

The program will:

- Foster innovative and critical thinking skills in the students
- Apply Bloom's taxonomy to the education process
- Provide and demonstrate the appropriate roles and responsibilities as well as monitor student compliance
- Deliver comprehensive didactic material
- Facilitate development of professional writing and documentation skills
- Concurrently integrate A & P principles and concepts throughout advanced portions of the course
- Mandate student research and delivery of various related presentations.

- B. **AFFECTIVE** – Develop professional attitudes in the EMS student.

The program will:

- Promote the importance of safe practices
- Promote the aspiration of life-long learning
- Provide opportunities that will lead students to appreciate and practice to the highest professional standards, including;
 1. Student involved in education
 2. Educator mindset
 3. Caring and compassion
 4. Interpersonal skills
 5. Teamwork
 6. Self-motivation
 7. Adaptability
 8. Conflict resolution
 9. Ownership and responsibility
 10. Innovation

- C. **PSYCHOMOTOR** – Develop and train the EMS student with the skill mastery to meet or exceed the requirements of the CCA program.

The Program will:

- Provide a variety of hands-on practice with equipment and procedures throughout the educational process
- Emphasize safety in all aspects of practice
- Mandate student mastery of skills
