Family Bridges provides advocacy, resources, and education for families with children birth to age 8. Our staff connects families to community resources. This is not a one-size-fits-all program. It is designed to support each family in their unique situation and provide holistic support.

**OUR WORK**

Through Family Bridges, we assist families in identifying community resources and addressing barriers to improve well-being. Our staff:

- Assist families with identifying community resources and addressing barriers
- Collaborate with community partners
- Connect ASQ assessments/developmental screenings and referrals to appropriate agency
- Provide flexible support for childcare

Our staff supports families in numerous ways. In the past, staff have connected families to:

- Childcare navigators
- Community resources (ex: food banks, health services, housing resources, etc.)
- Immunizations and other preventive services
- TANF or CCAP assistance

**THE INCREDIBLE YEARS**

Our staff also facilitate The Incredible Years, a free, 14-week parent group where caregivers learn strategies and skills known to promote children's social competence and reduce behavior problems. **100%** of caregivers that completed the program demonstrated an increase in positive parenting habits in 2019-2020.
